

THE FUTURE OF SKIN CARE IS SQUARE

FUSION[®]

BY **MIP**

AN INNOVATION WITH NO IMITATION

As a leader in incontinence care, MIP's latest offering is once again raising the bar in the evolution of skin care with the FUSION Patient Care Underpad.

Superior to its current quilted reusable counterparts, FUSION is a square, fused, unquilted underpad that offers the best in reusable bed linen protection. By eliminating the potential for pressure points, FUSION creates a smooth surface for a patient's sensitive skin to rest. With skin integrity at the forefront of its mandate, FUSION helps protect the patient's skin from moisture, shear and friction.

COMPARED TO COTTON-RICH UNDERPADS, FUSION OFFERS ENORMOUS BENEFITS. HERE'S HOW:

COTTON-RICH UNDERPAD

HIGH DETERIORATION

After 50 washes, quilted underpads show signs of distress between layers resulting in reduced performance and end of life.

PROGRESSIVE PILLING

The loose layers contribute to continued abrasion and pilling after every wash.

SHRINKAGE

Substantial shrinkage is evident after only a few washes.

Up to 11% shrinkage

BULKY LAYERS

Quilted underpads may bunch up, increasing the risk of developing pressure ulcers.

NEW FUSION UNDERPAD

LESS DETERIORATION

FUSION maintains its integrity and performance even after industrial washing.

NO PILLING

The intrinsic qualities of FUSION's sturdy, synthetic surface won't allow pilling to occur.

MINIMAL SHRINKAGE

FUSION's unique construction ensures it maintains its size after repeated washes.

Only 3% shrinkage

THIN PROFILE

Extreme comfort is achieved by the ultra thin profile that lays flat and unobtrusive.

*An estimated 7% of all hospital patients are at risk
of developing pressure ulcers over the course of their stay...*

THE SOLUTION IS FUSION!

BETTER PATIENT SKIN CARE

Pressure ulcers can result from the combination of pressure and friction or skin shear. Some of the most vulnerable patients are those who are immobile and incontinent.

The layering of multiple products to manage incontinence may also contribute to unwanted pressure buildup under the patient.

Pressure ulcers are easier to prevent than to heal. Start off by minimizing skin exposure to moisture by using a quick-drying, highly absorbent underpad, with the added benefit of a smooth, unquilted surface: use **FUSION!**

BENEFITS FOR THE NURSING STAFF

FUSION PROVIDES SUPERIOR PATIENT CARE

by promoting skin integrity in key ways that help healthcare facilities lower the incidence of certain Hospital Acquired Conditions.

WITH FUSION, YOU WILL:

- ✓ reduce pressure points
- ✓ eliminate wrinkling & surface puckering
- ✓ improve patient skin integrity & satisfaction scores
- ✓ require less repositioning
- ✓ support performance of specialty mattresses
- ✓ provide healthy micro-climate for patient's skin
- ✓ deliver total linen protection
- ✓ eliminate the need for double padding
- ✓ ensure fewer bed linen changes
- ✓ obtain an eco-friendly alternative to disposable incontinence pads

FUSION's unique square shape saves caregiver time by eliminating decisions over pad direction.

COTTON-RICH

FUSION

MORE PADS FIT ON YOUR NURSE CART

Fit over 60% more FUSION pads on a cart due to the unique thin profile.

SUPERIOR PRODUCTS - SOUND ADVICE

BENEFITS FOR THE LAUNDRY

REDUCE PROCESSING COSTS!

The combination of the many features of FUSION, including its stain release properties and durability, will cut on replacement costs. The square shape improves folding efficiencies since all sides are the same.

WITH FUSION, YOU WILL:

- ✓ benefit from longevity of underpads
- ✓ require 50% less re-wash compared to cotton-rich pads
- ✓ provide better service to your hospitals and facilities and improve their patient satisfaction scores
- ✓ acquire an all around-superior image
- ✓ have an environmentally friendly solution to bed linen protection
- ✓ defend against disposable competitors
- ✓ possess distinction in the industry

SUPERIOR STAIN RELEASE PROPERTIES
50% less re-wash is required with FUSION pads compared to cotton-rich pads.

BENEFITS FOR THE ADMINISTRATOR

REDUCE REPLACEMENT COSTS!

FUSION provides low cost per use that compares favorably to disposables and traditional cotton-rich pads as a result of reduced administrative costs and increased durability.

WITH FUSION, YOU WILL:

- contribute to the reduction in the treatment of HACs
- eliminate potential pressure points
- have patients and families identify your facility as innovative and forward thinking
- promote facility safe patient handling protocols
- maintain a commitment to safety and comfort

ENHANCED DURABILITY OFFERS COST SAVINGS

Benefit from FUSION's longer life to optimize your linen replacement budget.
